

ROBBY HUDIANSYAH

Frontend Developer / Fullstack Developer

Indonesia | hudiansyahrobby7@gmail.com |
[linkedin.com/in/robby-hudiansyah/](https://www.linkedin.com/in/robby-hudiansyah/)

SUMMARY

A skilled developer with more than 4 years experiences building responsive and user-friendly web or mobile applications. Proficient in modern front-end and back-end technologies, clean coding practices, and problem-solving to deliver effective and reliable solutions. Experienced in collaborating with teams, maintaining code quality, and implementing features that align with user needs and business goals.

EXPERIENCE

Infinity Wave – Johor Darul Ta'zim, Malaysia (Remote)

Frontend Developer (December 2024 – Present)

- Built reusable and modular UI components using React and Tailwind CSS to improve development efficiency and maintain consistency across the app
- Collaborated with designers to translate Figma designs into pixel-perfect and accessible UI components
- Engineered scalable and reusable components using React hooks and component composition, reducing code duplication
- Created a scalable and consistent design system from scratch using React and Tailwind CSS, including reusable components, typography, spacing, colour tokens, and design guidelines
- Refactored legacy codebase to improve readability, performance, and maintainability, adhering to modern best practices
- Developed and implemented new features from scratch based on product requirements, ensuring high performance and responsive UI

Codespace Indonesia – Malang, Indonesia (Remote)

Freelance Fullstack Developer (November 2023 – January 2024)

- Designed and implemented responsive user interfaces using modern web technologies like Next.js, Tailwind CSS, and Typescript.
- Optimized website performance for improved user experience and faster loading times.
- Ensured cross-browser compatibility and mobile-first design for diverse audiences.
- Translated wireframes and prototypes into high-quality code, ensuring pixel-perfect implementation.
- Implemented SEO best practices to improve website visibility and organic search rankings.
- Designed and developed a scalable Content Management System (CMS) using Node.js
- Created RESTful and nested APIs to enable seamless integration between front-end and back-end systems, ensuring efficient data handling and scalability.

DOT Indonesia – Malang, Indonesia

Full-time Frontend Developer (June 2021 – March 2025)

- Developed and maintained responsive and dynamic web applications using modern frontend technologies to enhance user experience and meet client requirements.
- Collaborated with UI/UX designers to transform wireframes and prototypes into functional, high-quality front-end components.
- Mentored junior developers by providing guidance, reviewing their code, and sharing best practices to enhance their skills and ensure project quality.
- Optimized application performance and ensure cross-browser compatibility through efficient coding practices and testing.
- Conducted code reviews and implement feedback to ensure clean, maintainable, and scalable code.
- Analyzed and troubleshooted application issues, ensuring timely resolution to maintain system reliability.

Lumbung Inovasi – Lombok, Indonesia

Intern Backend Developer (February 2021 – April 2021)

- Developed a microservice-based application using Node.js and Express, focusing on creating independent, scalable services that communicate via RESTful APIs.
- Designed and implemented data models and integrated microservices with database using PostgreSQL
- Collaborated with the team to improve the performance and scalability of the app.

PROJECTS

FOX CMS (December 2024 – Present) – Frontend Developer

Developed and integrated custom features in CMS, enabling dynamic content management and improving editor workflow

- Technologies used : React.js, Tailwind CSS, Javascript, REST API
- Developed and integrated custom CMS features to support dynamic content creation and improve editorial flexibility
- Built reusable React components and custom form fields tailored for content editors
- Refactored legacy code to align with modern coding standards, improving codebase readability and performance
- Worked closely with UI/UX designers to translate Figma designs into interactive components

FOX Website (March 2025 – Present) – Frontend Developer

Designed and developed a responsive landing page using React and Tailwind CSS, optimized for high conversion rates and seamless user experience

- Technologies used : Next.js, Tailwind CSS, Typescript, REST API
- Developed a responsive, mobile-first landing page using React and Tailwind CSS, ensuring compatibility across all devices and screen sizes
- Optimized landing page for SEO by following best practices, including metadata, structured data, and clean URLs
- Integrated WordPress as a headless CMS to manage dynamic content for the landing page

SEVA CRM (April 2023 – March 2025) – Frontend Developer

Developed a customer relationship management (CRM) platform to streamline client management processes for businesses.

- Technologies used : React.js, Vite, Tailwind CSS, Typescript, REST API
- Implemented responsive user interfaces, ensuring compatibility across devices and browsers.
- Created and maintained a design system to ensure consistency across the CRM's UI components.
- Optimized front-end performance, improving load times and enhancing the user experience.
- Delivered documentation for the design system and front-end components to support team collaboration.

FLIP REVAMP (November 2022 – July 2023) – Fullstack Developer

Built a visually appealing landing page for Flip, aimed at increasing user engagement and conversions.

- Technologies used : Next.js, Chakra UI, Typescript, REST API, Node.js Strapi.js
- Implemented a responsive landing page optimized for both desktop and mobile devices.
- Focused on performance optimization, ensuring fast load times through efficient coding practices.
- Optimized front-end performance, improving load times and enhancing the user experience.
- Integrated SEO best practices to improve search engine rankings and visibility.

EDUCATION

MATARAM UNIVERSITY (2018 - 2023)

Bachelor of Electrical Engineering - GPA 3.7

SKILLS

- **Languages:** HTML5, CSS3, Javascript (ES6+), Typescript
- **Frontend Web Development :** React.js, Next.js
- **Frontend Mobile Development:** React Native
- **Backend Development:** Node.js, Express.js, Nest.js
- **Database:** MySQL, PostgreSQL, Redis
- **API Integration :** REST API, GraphQL
- **CSS Frameworks :** Tailwind CSS, Ant Design, Chakra UI, Shadcn UI
- **State Managements :** Redux, Zustand
- **Unit Testing Tools:** Jest, React Testing Library
- **End-to-End Testing Tools :** Cypress
- **Deployment:** Docker, Amazon Web Services (AWS)
- **Version Control :** Git, GitHub, Gitlab

- Performance Optimization
- Responsive Web Design & Mobile-First Development
- Cross-Browser Compatibility
- UI/UX Implementation & Design Systems
- Agile & Scrum Methodologies
- Problem-Solving & Critical Thinking
- Debugging & Troubleshooting

CERTIFICATES

- **Meta Front-End Developer Professional Certificate** by Meta (2025)
- **Meta React** by Meta (2025)
- **Meta Advanced React** by Meta (2025)
- **Frontend Developer React** by HackerRank (2024)
- **React Native – The Practical Guide [2024]** by Udemy (2024)
- **NestJS: The Complete Developer’s Guide** by Udemy (2024)
- **Javascript Intermediate** by HackerRank (2024)
- **Becoming Front-End Web Developer Expert** by Dicoding Indonesia (2020)

LANGUAGES

- **English:** Proficient (IELTS Overall 7.0 / C1)
- **Indonesian :** Native
